**GOAL 1***: Sustainable and equitable facilities -*  **Public facilities, services and infrastructure systems are provided in an efficient and effective manner serving all levels of population.**
(5/17/12   WG suggested edit)

**GOAL 1**:  **Sustainable and equitable public facilities, infrastructure systems and services are provided in an efficient and effective manner serving all levels of population.**

(5/18/12   B. Caravona suggests editing.  Rational: Keep goal format consistent with other element sections.  They have been written as sentences, not a concept followed by a hyphen and explanatory sentence.)

    A. **Policy 1**. Provide fiscal balance between provision of service to new areas and renovating service in existing neighborhoods.

    B. **Policy 2**. Tailor service delivery programs based on local area requirements.

    C. **Policy 3.** New Developments shall pay their fair share toward the cost of additional capital improvements, infrastructure and public service needs created by the development.

    **D.  Policy 4.**  Implement Capital Improvements Program to fulfill the vision of the Regional Plan

    **E.  Policy 5.** Encourage the integration of service location to provide more accessible service.

    F.  **Policy 6.** Support Enhanced Civic Design for all public facilities.

    G. **Policy 7. (5/17/12  Nat White suggestion:** Would like to incorporate a policy that directly deals with library location.  Group to research if there is a 'standard' by population. )

(Staff comment: **I really had a hard time understanding this policy or how it fit with this goal without the strategies listed below. With the text it was even better but still hard to digest alone – I think of writing staff reports and utilizing this policy – it wouldn't really stand alone and I am not sure how to fix it.**  Action: Stephanie Smith to review).¶
Strategies: ¶
Update internal review procedures to take into account design, economic, environment and climate elements when planning for new development and supporting existing development. ¶
Incorporate efficient and renewable energy processes and technologies into existing and future City and County operations.¶
Identify opportunities to reduce the incremental water and energy use as a result of population growth.¶
Research opportunities to update and offset engineering design standards to ensure enhanced preparedness for weather related impacts.¶
Apply defensible property principles to City and County facilities and infrastructure.¶
