# How This Plan Works

## Who this Plan is For

The *Flagstaff Regional Plan* applies to the 525-square-mile FMPO planning area. It extends from Bellemont to Winona and from Kachina Village and Mountainaire to north of the San Francisco Peaks. The Plan serves as the general plan for the City of Flagstaff, and in the county areas works in conjunction with the Coconino County Comprehensive Plan and other community area plans. This Plan is for the people that live here, and the businesses that employ here. This Plan is for the visitors, prospective businesses, elected officials, City and County departments, the development community, interest groups, and resource agencies. This Plan is for the present and future generations.

## How this Plan is Used

The *Flagstaff Regional Plan* is used for decision making so that Flagstaff City government is accountable for publicly derived policy outcomes and goals. It also provides the basis for policies and regulations to guide physical and economic development within the Flagstaff region. The Plan will be used as a guide, or roadmap, for the future of the City and the region, and it establishes priorities for public action and direction for complementary private decisions, thus striving to establish predictability in the decision-making process.

General plans are not static documents; they recognize growth as a dynamic process, which may require revisions to the plan as circumstances or changes warrant. This Chapter works in conjunction with Flagstaff City Code, Title 11, Chapter 11-10 (General Plans), to establish the process for how to amend the Plan.

The Planning Process

Why Do We Plan?

We plan in order to guide growth and development in a way that allows our region to remain an outstanding area in which to live. We also plan so that we may build and pay for larger projects that benefit our whole community, present and future. This plan presents a comprehensive vision for the future of the area, and provides guidance as to how that vision can become a reality.

Why Do We Have a Regional Plan?

The Growing Smarter Statutes adopted by the State Legislature in 1998 and 2000 require that all municipalities and counties adopt general or comprehensive plans, and that these plans be updated every 10 years. However, the principal reason to have a plan is to make informed choices about our future. The Flagstaff Regional Plan contains goals and policies that provide guidance for making choices about public investment and for setting priorities.

A Regional Focus

The City and surrounding communities all have unique identities and characters, but as a whole, the greater Flagstaff area functions as a unified community. Residents of the outlying neighborhoods and tribal lands work and shop in the city, attend the schools, and use the services and medical facilities that are largely located within the City. The City and the County do address capital improvements differently; however, economic and environmental issues such as water and air quality, forest protection, and open space do not adhere to political boundaries. As such, the City and County chose to partner on the Plan even though they were not legally required to do so.

Creation of A Vision for our Community: Flagstaff 2020 was the first step in bringing the City and County together, which was continued through the 2001 Regional Land Use and Transportation Plan (RLUTP) and enhanced in this Flagstaff Regional Plan.
INTRODUCTION   |   How This Plan Works        III-3

As amended, January 5, 2017  |

Arizona Revised Statutes 9-461.05 Requires a GENERAL PLAN for all cities - updated every 10 years

Flagstaff Regional Plan 2001 Council and Supervisors decide to plan for the REGION

Shared Transportation Schools Job Centers Water Resources Shopping

Citizen Advisory Committee (CAC) formed 19 members

Community Vision Vision of what the residents want the region to become, vision of what must be preserved

Larger Trends Local, state, national and global trends to anticipate needs and challenges. Resilience to unknowns – temperature, weather, resources, economics, etc.

Best Practices Lessons learned by other communities

Current Local Conditions and Historical Trends Census data, scientific research, economic indicators, academic reports, elected officials’ priorities

Creating a Plan that Works

The Flagstaff Regional Plan is a living, working plan that relies on the disciplined and artful execution of three activities. First, the analysis of local conditions and historical trends, larger trends, our community vision, and best practices was learned from other communities. Second, the information gathered for those inputs was incorporated in a planning process that recognized the high level of economic, social, and environmental uncertainty we currently face. Third, the Plan must communicate transparently how those inputs were utilized and why the final plan decisions were chosen over other alternatives.

How We Got Here

The Flagstaff Regional Plan is the guiding policy document for the City of Flagstaff as required by state law. It is important that the Plan was created as a collaboration of Flagstaff citizens, public officials, and staff members, using an open planning process. A 19-member Citizen Advisory Committee (CAC) was appointed by the Flagstaff City Council and Coconino County Board of Supervisors. The CAC met monthly or bimonthly for over four years to develop the vision, guiding principles, and goals and policies for each of the topics covered by this Plan. In addition, a Steering Committee comprised of two Councilpersons and two Supervisors met quarterly to keep the process on track and make sure the public participation plan was effective. A core planning team of City and County staff also met regularly throughout the process to provide support to the CAC, draft sections of the Plan, and carry out all aspects of public participation.

Hundreds of City and County residents provided important comments through open houses and focus groups, provided comments on the web site, blogs, and participated in surveys, all of which were crucial in defining the Plan’s direction.

Ensuring Transparency Integrate critical inputs Communicate rationale Citizens have a clear path for feedback and critique Decision transparency Effective evaluation of results achieved Knowing the VISION will evolve as conditions change

Flagstaff Regional Plan 2030: Place Matters
Implementing the Flagstaff Regional Plan

The relationship between the Flagstaff Regional Plan and such implementation tools as master plans, the Zoning Code, and other regulations is illustrated in the pyramid graphic on Page III-5; the Flagstaff Regional Plan establishes the vision for the future growth and development of Flagstaff and its surrounding area through goals and policies. City-adopted master plans and County area plans, City and County Zoning Codes, and other City codes, on the other hand, implement the goals and policies of the Flagstaff Regional Plan by providing standards, regulations, and tools for land development.

City of Flagstaff

Who implements the Regional Plan?

Most importantly, the Flagstaff Regional Plan is used in the regulatory decision-making process by the City Planning and Zoning Commission, City Council, and City staff. The Commission and the Council are responsible for making development decisions such as zoning map amendments or annexations, approval of which depends on whether the proposed changes or projects are consistent with the Plan’s goals and policies. When reviewing...
development proposals, City staff, the Planning and Zoning Commission, and the City Council will review applicable goals and policies to determine whether a proposed development is consistent with the Plan. The Future Growth Illustrations (Maps 21 and 22) and the text of the Plan will provide supplemental information for the interpretation of goals and policies. In case of any conflict between the Future Growth Illustration and the Plan's goals and policies, the goals and policies will prevail. The Plan is also used to guide decisions related to the expansion of public infrastructure, for example, the building or improvement of new roads and trails, investment in parks or public buildings, and other facilities. Many initiatives to improve the community start at the grassroots level. Thus, the Plan may be used by all citizens in order to ensure that new development conforms to the Plan and for assistance in implementing actions that will further the Plan's vision and direction. Generally, the City will use the Plan as follows:

- **City Council**—will use the Plan to evaluate development applications and City projects that come before Council and require consideration of the Plan. City Council makes findings of conformance based on the Plan and uses it to inform discussions of compatibility for land use decisions, such as Regional Plan amendments, zoning map amendments, annexations, discretionary development applications, and master/specific plans. The Flagstaff Regional Plan provides a general background (why/intent), goals and policies (how), and a sense of priorities for making decisions. The Plan is broad enough to permit Council priorities to change between major plan updates.

- **City Planning and Zoning Commission**—serves in an advisory role to the City Council, and will use the Plan similarly, possibly to provide a clear connection to supporting technical documents to best justify or explain their recommendations.

- **City Management (including legal counsel, department, and division heads)**—also serve in an advisory role to the City Council, and will use the Plan to review staff recommendations, assess legal implications (e.g., property acquisition or impact issues), and explain budget and program recommendations (e.g., funding for master planning efforts, regulation updates, business attraction efforts, facilities planning).

* Photo by: Tom Bean
• **Public Agency Staff**—will use the Plan to develop and evaluate development application requests such as Regional Plan amendments, zoning map amendments, subdivision plats, and other requests that require recommendations to management and governing bodies. The Plan will permit staff to clearly communicate to applicants the community expectations and concerns relevant to the property in question, subsequent recommended modifications or conditions for approval, and the reasoning behind them. Further, the Plan will be an essential tool for all City staff when, for example, prioritizing capital improvement projects, pursuing land acquisition, and developing agency budgets.

• **Development Community/Realtors/Prospective Buyers/Land Owners**—will use the Plan to determine the desirability of different development proposals on their properties, advise developers or owners on best available properties suitable to a proposed use or “highest and best use” for a given property, inform on the range of possible uses surrounding a property and their potential impacts on that property, and inform on long-range changes including infrastructure.

• **Interest Groups (e.g., environmental, business, education)**—similar to property owners, interest groups will use the Plan to advocate positions related to proposals, but often on a broader range of policy issues. These groups may use the Plan to advocate for or against new initiatives such as plans, infrastructure investments, educational programs, or business districts.

• **Resource Agencies**—will use the Plan in discussions with the City on resource-agency management plans, joint agreements, and cooperative initiatives.

• **General Public**—requires an accessible Plan that allows them to decide on whether the Plan represents the “right” direction for the region.

• **Future Generations**—will have the full benefits, as well as address the challenges, of this Plan.

**How Do We Implement?**

The *Flagstaff Regional Plan* is intended to play a pivotal role in shaping the future of the City. Implementation of the Plan will evolve over time with new budgets, capital plans, work programs, and changing priorities, but listed below are some practical ways to ensure that future activities are consistent with the *Flagstaff Regional Plan*:

• **Capital Improvement Plans**—The City’s capital improvement plans and long-range utility and transportation plans will be prepared consistent with the Flagstaff Regional Plan’s land use policies and infrastructure recommendations (water, sewer, stormwater, transportation, and parks/recreation). Major new improvements that are not reflected in the Flagstaff Regional Plan, and which could dramatically affect the Plan’s recommendations, should be preceded by a comprehensive update to the Plan.

• **Development Approvals**—The approvals process for development proposals, including zoning map amendments and subdivision plats, are an important implementation tool of the Plan. The City of Flagstaff’s Zoning Code (Flagstaff City Code Title 10) and the Subdivision Regulations (Title 11) will be updated in response to regulatory strategies presented in the Plan.

• **Illustrative Plans**—These are plans or maps that depict (illustrates, but does not regulate) the streets, lots, buildings, and general landscaping for proposed development and redevelopment areas.
• **Master or Specific Plans**—Master plans or specific plans should include a statement(s) describing how the plan implements *Flagstaff Regional Plan* goals and policies, and how it is compatible with the Plan.

• **Economic Incentives**—Economic incentives should carry out *Flagstaff Regional Plan* goals and policies. Areas identified by specific and illustrative plans should have higher priorities for incentives and public/private partnerships.

• **Private Development Decisions**—Property owners and developers should consider the strategies and recommendations of the Plan in their own land planning and investment decisions. Public decision-makers will be using the Plan as a guide in their development-related deliberations.

• **Annual Work Programs and Budgets**—The City Council and individual City divisions will use the Plan when preparing annual work programs and budgets.

• **Future Interpretations**—The City Council should call upon the City Planning Director and Planning and Zoning Commission to provide interpretation of major items that are unclear or are not fully addressed in the Plan. In formulating an interpretation, the Planning Director and Commission may call upon outside experts and other groups for advice. Minor items that require interpretation should be handled by the appropriate agency as it implements the Plan.

• **Staff Reports**—When preparing reports to the City Council and City Commissions, staff reports should identify if and how the Plan's goals and policies are being implemented.

**Coconino County**

For areas outside the City of Flagstaff limits, but within the FMPO boundaries, the *Flagstaff Regional Plan* will guide land use decisions in conjunction with the Coconino County Comprehensive Plan and applicable area plans. The goals and policies in the Plan are used by County planning staff, the County Planning and Zoning Commission, and the Board of Supervisors to evaluate development proposals and to determine if such developments are appropriate for the unincorporated areas of the FMPO region. The *Flagstaff Regional Plan* is consistent with and complementary to the Coconino County Comprehensive Plan and the local community area plans in the region. These plans are decision-making tools used by residents, landowners, developers, Coconino County Community Development, Planning and Zoning Commission, and the Board of Supervisors. The Plan also serves as a comprehensive reference and blueprint for community programs as well as for public- and private-sector initiatives.

**Relationship to Other Planning Documents**

The *Flagstaff Regional Plan* incorporates, updates, and builds upon many past planning efforts within the Flagstaff region, and every effort has been made to ensure consistency with these other planning documents and to minimize conflicts.

Appendix A contains a list of documents that implement, or are related to, the *Flagstaff Regional Plan*. 
Flagstaff Pathways 2030 Regional Transportation Plan

The FMPO adopted the Flagstaff Pathways 2030 Regional Transportation Plan (RTP) in December 2009 that identifies and prioritizes future transportation investments for roads, public transit, and trails. This plan evaluates the cost and effectiveness of projects for each major travel mode and addresses the relationships between land use, transportation, the economy, and the environment. This document is updated every five years.

Other Regional Planning Documents

There are two federal management plans in the planning area for Walnut Canyon National Monument and Sunset Crater Volcano National Monument. In addition, the Coconino National Forest has been working to revise its Forest Plan. At the county level, the Coconino County Comprehensive Plan adopted in 2003 also applies to the 460 square miles of unincorporated county land within the Flagstaff Regional Plan area. In addition, the County has 10 community area plans, of which five are within the area covered by the Flagstaff Regional Plan—Bellemont, Fort Valley, Doney Park Timberline-Fernwood, Kachina Village, and Mountainaire. These area plans also have goals and policies specific to each community and four of the five also have design review overlay guidelines which serve to ensure that new commercial buildings are compatible with the character of each community.

Specific Plans and Studies for Areas and Corridors

The purpose of a specific plan is to provide a greater level of detail for a geographic area or element of the Regional Plan, and to provide for the systematic implementation of the Regional Plan. Specific plans can also be adopted as master plans for development when they accompany a request for rezoning. The development of specific plans is essential for implementation of the Flagstaff Regional Plan and its vision. These plans are necessary to further determine the nature and scale of activity centers, corridors and neighborhoods, the cross-sections and alignment of future corridors, and the priority of goals and policies in a particular area. For more details about the content and purposes of specific plans, see Flagstaff City Code, Title 11, General Plans and Subdivisions. Specific plans can be adopted in a number of ways.

Specific plans adopted by ordinance provide development standards and phasing of infrastructure for the planned area. The Flagstaff Regional Plan cannot supersede specific plans adopted by ordinance, but must be considered if they are amended.

Specific Plans adopted by resolution are official City policy providing direction on how to implement the Regional Plan. If the plan was developed prior to May 2014, only portions of the specific plan that align with the Regional Plan 2030 are valid.

Plans that were proposed but not adopted by resolution or ordinance can be used as strategic documents and studies to better understand unique community and neighborhood issues. They reflect the desired future conditions supported by the community unless specifically rejected by the City Council. Rezoning, annexation, and plan amendment requests typically consider these plans and studies, but are not required to demonstrate conformance with them.

Within each specific plan or study, there is language that describes which parts of the documents are aspirational, advisory, strategy, and which are standards and guidelines. Specific Plans need to be read in the context of their status, intent, and conformance with the Regional Plan. Appendix A lists Specific Plans that were adopted or worked on by the City and their status.
Keeping the Plan Current

Annual Plan Review and Monitoring

The purpose of annual reviews and monitoring is to ensure that the Plan continues to reflect core community values and to evaluate how new developments have been approved in compliance with the Plan. To achieve this, department directors will provide the City Manager and City Council with an annual review of Regional Plan-related activities. This review will accomplish the following:

- Measure the City’s success in achieving Plan goals and policies through recommended strategies such as measuring on a per-project basis how sustainability indicators have been achieved
- Identify proposed strategies to be pursued under the coming year’s budget
- Identify unlisted strategies that will achieve Plan goals
- Document growth trends and compare those trends to plan objectives
- List development actions that affect the Plan’s provisions
- Explain difficulties in implementing the Plan
- Review community indicators
- Review outside agencies’ actions affecting the Plan.

Refer to Appendix D, Annual Report Template

Comprehensive Plan Review

To ensure that the Flagstaff Regional Plan remains an effective guide for decision-makers, Flagstaff will conduct comprehensive evaluations of the Plan every 10 years as required by Arizona Revised Statute §9-461.06 and should address the following in addition to any state mandated requirements:

- Progress in implementing the Plan
- Changes in community needs and other conditions that form the basis of the Plan
- Fiscal conditions and the ability to finance public investments recommended by the Plan
- Community support for the Plan goals and policies
- Changes in state or federal laws that affect the City’s tools for Plan implementation
- Changes in land ownership, usage, or development in areas immediately outside of the planning boundary and jurisdiction (such as those that might be implemented on the Navajo Nation to the east and north, or by the Hopi Tribe on parcels it owns, or by Camp Navajo to the west, or in communities such as Parks).

The Flagstaff Regional Plan is a dynamic document that can be updated, revised, and improved over time to respond to emerging issues, new ideas, and changing conditions. To assess the Plan’s effectiveness, the City will need to monitor actions affecting the Plan. As a result of these monitoring efforts or private development requests, the City will need to amend the Plan periodically. The Planning and Zoning Commission and City Council need to consider each proposed amendment carefully to determine whether or not it is consistent with the Plan’s goals and policies. In addition, the cumulative effect of many changes may result in a change in policy direction. For this reason, Plan amendments must be evaluated in terms of their significance to overall City policy. A comprehensive summary listing of the goals and policies for the Plan is included in Appendix B, and will serve as a valuable tool to ensure any future changes or amendments are in keeping with the Plan’s original vision and intent.
Amendments and Development Review Processes

The codified processes described below serve as tools for City staff to implement the goals, policies, and strategies of the Flagstaff Regional Plan. In addition, through public hearings when applicable, these processes provide opportunities for citizens to make recommendations to the Planning and Zoning Commission and City Council regarding the goals and policies of the Flagstaff Regional Plan.

Annexations – All proposed annexations will be evaluated for consistency with the goals and policies of this Plan. The proposed annexation should not be detrimental to the majority of the persons or property in the surrounding area or the community in general. The City’s basic position regarding annexation is that the annexation must demonstrate a favorable benefit to the taxpayers of the City. All applications for annexations of real property shall be reviewed, processed, and approved in conformance with Arizona Revised Statute §9-471 et seq. (Annexation of territory, procedures, notice, petitions, access to information, restrictions). Annexations may be initiated by the following:

- City Council or City Manager – The City Council or the City Manager may direct the Planning Director to review a specific property to determine whether it may be legally annexed and to contact property owners to determine whether they will sign an annexation petition.

- Property Owners – One or more property owners may submit an application to the City to annex property.

Zoning Code Amendments – In accordance with the City of Flagstaff Zoning Code, Division 10-20.50, an amendment to the Zoning Map or the text of the Zoning Code may only be approved if:

- The proposed zoning map amendment(s) is consistent with and conforms to the goals and policies of the Flagstaff Regional Plan and any applicable specific plans.

- If the application is not consistent with and does not conform to the Flagstaff Regional Plan, and any other specific plan, the applicable plan must be amended in compliance with the procedures established in the Flagstaff City Code, Title 11, Chapter 11-10 (General Plans), prior to consideration of the proposed amendment(s).

Public Development Projects – City- and County-sponsored projects and Capital Improvement Programs should be required to adhere to all applicable goals and policies of the Flagstaff Regional Plan through project planning and budgeting to ensure funding is available to implement the Plan.

Comprehensive Updates and New Elements

Refer to Flagstaff City Code, Title 11, Chapter 11-10 (General Plans), for procedures relating to the addition of a new element to the Regional Plan, or for comprehensive General Plan update requirements.

Amendments to Text and Maps 21, 22, 24, and 25

Major plan amendments should evaluate proposals that would substantially alter the balance between the goals and policies of the Flagstaff Regional Plan. When a major plan amendment is proposed, it will be evaluated for its conformance to goals and policies, and systematic impacts that would alter the expected growth scenario that the Regional Plan embodies (See Page II-11 for scenario details). The growth scenarios that were used to develop the
Future Growth Illustration. The scenarios were based on a computer model to integrate land use, transportation, and environmental outcomes to a preferred build out scenario that informed the Regional Plan's Maps 21 and 22 (Future Growth Illustration), Map 24 (Activity Centers), and Map 25 (Road Network Illustration). When a major plan amendment is proposed to these maps, its expected outcome will be compared to the original assumptions of the plan and the systematic impacts of the change. Only those changes listed in the chart as requiring a major plan amendment need such an amendment. All other changes require only a minor plan amendment.

A major plan amendment is required when a proposal meets any one of the criteria on the chart on Pages III-14 and III-15. Major plan amendment categories “1” through “8” relate to Maps 21, 22, 24, and 25. Any changes made to the content of these maps can be carried forward to other maps that use the same map features for background, as part of the City’s annual update. Major plan amendment category “9” applies to text found in the “Goals and Policies” call-out boxes that are located throughout the document, and to the “Major Plan Amendments Chart” on Pages III-14 and III-15. Deletions, additions or changes to goals and policies in the Regional Plan can only be proposed by the City of Flagstaff’s Council, Commissions, or staff.

Any other changes to the Regional Plan not shown in the Major Plan Amendments Chart are considered minor plan amendments. Minor plan amendment analysis is focused on conformance with the goals and policies of the Regional Plan. Some examples of minor plan amendments are:

- Changes from urban to suburban area types outside of activity centers
- Changes from suburban to urban area type inside an activity center
- Changes from urban, suburban, and rural area types to employment
- Identifying a new area type for an “Area in White” on Maps 21 and 22
- Refinement of place types at the parcel level as part of a specific plan
- Wording changes to goals and policies that do not substantially alter their meaning
- Expansion of the Urban Growth Boundary to bring an area already served by City utilities into compliance or to serve facilities in Parks/Open space.
- Adding a commercial or residential corridor in a new subdivision

### Major and Minor Plan Amendment Procedures

The Regional Plan is a living document and is expected to be amended regularly to keep it current and relevant. There are two types of plan amendments: major and minor. In Arizona, each jurisdiction can determine what changes require a major plan amendment in the General Plan (Flagstaff Regional Plan 2030). The procedures for processing plan amendments can be found in the Flagstaff City Code, Title 11, General Plans and Subdivisions. Flagstaff City Code may change independent of the Regional Plan and should be used to refer to details of any related process.

Arizona Revised Statutes (A.R.S.) require all major amendments to the Regional Plan to be presented at a single public hearing during the calendar year the proposal is made. The process for major amendment proposals is very specific and deadline driven. Major plan amendments must be processed before an application for rezoning or annexation can be accepted. The process includes public notification, Planning and Zoning Commission review, and a minimum of three public hearings. The proposal is also required to be sent to the Planning and Zoning Commission and the City Council; it requires a review and comment period 60 days prior to public notice. Major amendments to the general plan also require an affirmative vote of at least two-thirds of the members of the City Council. These requirements may be changed by the City or the State.

A minor amendment to the general plan requires only one public hearing by the Planning and Zoning Commission and one by the City Council. These minor amendment public hearings may be held at any time during the calendar year, and require a simple majority vote of the City Council. Minor plan amendments may be processed concurrently with rezoning and annexation applications. Some minor plan amendments may have consequences for how the Plan is implemented, but it is difficult to define them as “major” based on any criteria that could be identified early in the application process.
Amendments to Other Maps and Plan Content

If the Plan changes are the result of a development application that complies with the urban growth boundary, area types, and place types, amendments to other maps in the plan may be completed as part of the City’s annual update of the Regional Plan. In these cases, it is not required to have a plan amendment processed along with the development application. If the application requires a change to the urban growth boundary, area or place types, then all amendments to other maps in the Regional Plan should be processed concurrently. Changes or updates to other content of the Regional Plan not resulting from a development application will be gathered throughout the year and presented for City Council adoption along with the Regional Plan Annual Report.

Area and Place Type Guidelines

Maps 21 and 22 (Future Growth Illustration) and Map 24 (Activity Centers) are generalized representations of area types and Activity Center and Neighborhood place types. Map 25 (Road Network Illustration) includes representations of the commercial corridor place type. Residential corridors and other streets on Map 25 are not considered place types. The following paragraphs relate to the content of Chapter IX: Growth and Land Use. Chapter IX describes areas and place types through the maps, goals and policies, and Tables of Characteristics, which give detail on the desired conditions within Urban, Suburban, and Rural Activity Centers, Neighborhoods, and Corridors. These guidelines describe how the background text, goals and policies, and maps are used to determine if a proposal complies with the area and place type, or requires an amendment.

Descriptions of Area and Place Types

Tables of Characteristics include information that describes the combined area-place type, such as Suburban Neighborhood, in terms of desired pattern, block size, density and intensity, mix of uses, transportation, open space, and parks. Parks/Open Space, Employment, and Special District area types are not described in the tables but have explanations of similar characteristics described in the text. These tables are intended to be interpreted at a scale that at a minimum is a neighborhood or activity center, and may be larger.
Every row of the Tables of Characteristics for area and place types is not a standard or guideline unto itself. The tables are meant to be taken as a whole, and used along with an analysis of how the project would or would not move the community towards the goals and policies throughout the document. For projects that are generally compatible with the characteristics in the table and related goals and policies, but do not fall within the range of density or intensity, the planner will consider the site-specific preservation of nature resources and compatibility of the proposal with the existing and future neighborhood context through an analysis of goals and policies. Specific plans may further refine how density and intensity is considered within an activity center or a neighborhood.

**Locations with More than One Area or Place Type**

If there are overlapping area types, either type could be used to analyze plan consistency without requiring an amendment to Maps 21 and 22 (Future Growth Illustration).

Places with “future” area types on Maps 21 and 22 (Future Growth Illustration) that are currently developed to a lower intensity and density do not require an amendment if they are compatible with the existing development pattern. For instance, if an area with a future urban/existing suburban area is proposed for a development that fits the suburban area type according to the table of characteristics, then an amendment is not required. If a place has only a future area type and no existing area type, then the application must conform to the future area type.

Parcels with more than one area or place type do not have to meet the exact acre of each area type. The lines dividing each area type are general, unless a specific plan has made site-specific interpretations. Parcels with more than one area or place type must show they meet the intent of what is displayed on Maps 21 and 22 (Future Growth Illustration). For example, a 20-acre parcel with “urban” next to a commercial corridor and “suburban” further away can show that the proposal increases density in the front of the property along the road and scales back without having 10 acres of each. In such a case, a plan amendment would not be required. If the parcel is along a commercial corridor or within the pedestrian shed of an activity center, characteristics of the place types must also be demonstrated.

**Specific Plan Amendments to the Flagstaff Regional Plan 2030**

Specific Plans are processed as a minor amendment but follow the enhanced procedural requirements for public participation and notification required of major plan amendments. If a Specific Plan proposes a change to the Regional Plan related to certain major amendment categories (See Footnote 1 on Pages III-14 and III-15), and the application follows the same notification and public participation requirements of a major plan amendment, the proposal may be exempted from the timeline for submittals and reviews of major plan amendments in Title 11, Chapter 11-10 (General Plans).

</table>

¹ This category excludes changes that are the result of a Specific Plan. Such changes will be processed as minor amendments.
² See tables of Area/Place Type Characteristics found in Chapter IX: Growth and Land Use, and relevant Specific Plans for the range of density, intensity, and mix of uses.
³ Deletions, additions, or changes to text in the Regional Plan can only be proposed by the City of Flagstaff’s Council, Commissions, or staff.
⁴ Lands designated for conservation and active or passive recreation are displayed as Parks/Open Space on the Future Growth Illustration. Public facilities, such as tanks, utilities, roads, and staging areas, may be located within the Parks/Open Space area type. If these facilities have substantially altered the natural environment or created a brownfield site, removing them from the Parks/Open Space designation may be processed as a minor amendment. Expansion of such facilities does not require a plan amendment.
⁵ Commercial Corridors are identified on Map 25: Road Network Illustration.
