- Cross Section Line
- Elevation Reference Mark
- River Mile

FLOODWAY  
 A—A  
 RM7  
 • M1.5

**NOTES TO USER**

Boundaries of the Floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

This map was prepared to facilitate flood plain management activities only; it may not show all special flood hazard areas in the community or all elements, features outside of the flood plain. Refer to the latest official Flood Insurance Rate Map for any additional areas of special flood hazard.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/20 inch.

For adjoining map panels, see separately printed Index to Map Panels.

**ELEVATION REFERENCE MARKS**

REFERENCE MARK	ELEVATION (FT. NGVD)	DESCRIPTION OF LOCATION
RM8	6889.406	U.S. Coast and Geodetic Survey standard triangulation station disk stamped "TUT 1958", located 4.0 miles east along U.S. Highway 89 from the Santa Fe Railway station in Flagstaff to a T-road right, turn right and go south for 2.2 miles on gravelled road to a track road, turn left and follow the track road east for 0.2 mile to a fork, at a powerline, turn sharp left and follow the track road north along the powerline for 0.2 mile, leave the track road and go west across country for 0.2 mile to the highest point of the ridge, 65 feet southeast of a triangular blazed pine tree, 14 feet east of a witness post and cemented in a drill hole in bedrock that is flush with the ground.
RM11	6878.505	U.S. Coast and Geodetic Survey standard bronze disk stamped "T 340 1958", located 1.2 miles east along U.S. Highways 89 and 88 from Santa Fe Railway station at Flagstaff, then 0.2 mile south along a gravel road, then 0.6 mile east along a gravel road to a sign HEROLD RANCH, then south 0.1 mile, then 0.2 mile east along a track road to a power line; from here go southeast until reaching a power line running east, follow the power line for approximately 1.5 miles to the bench mark on the east edge of a steep hill, 9 feet north of a double power line pole, 6 feet southwest of the witness post, set in a drill hole in bedrock that is flush with the ground.
