

**ELEVATION REFERENCE MARKS**

| REFERENCE MARK | ELEVATION (FT. NOV) | DESCRIPTION OF LOCATION  |
|----------------|---------------------|--|
| RMS            | 6679.822            | U.S. Geological Survey standard disk, stamped "8878.021 L 32 1933" and set in the top of a concrete post projecting approximately 4 inches above ground, located approximately 0.75 miles west and south along U.S. Highways 89 and 88 from the Ashcroft, Topoka & Santa Fe Railway station at Flagstaff, then 1.2 miles south along U.S. Highway 89 A, approximately 144 yards south of a culvert, approximately 150 yards south of a railroad trestle, on a ridge south of a dry wash, 30 feet west of the centerline of the highway, and 12 feet south of pole 12276. |

**KEY TO MAP**

- 500-Year Flood Boundary
- 100-Year Flood Boundary
- FLOODWAY FRINGE
- 100-Year Flood Boundary
- 500-Year Flood Boundary
- Approximate 100-Year Flood Boundary
- Cross Section Line
- Elevation Reference Mark
- River Mile

**NOTES TO USER**

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

This map was prepared to facilitate flood plain management activities only; it may not show all special flood hazard areas in the community or all planimetric features outside of the flood plain. Refer to the latest official Flood Insurance Rate Map for any additional areas of special flood hazard.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/20 inch.

For adjoining map panels, see separately printed Index to Map Panels.
