Ground-Breaking Infrastructure Upgrades Continue This Summer

Waterline Replacement Supports Service Reliability

Post Date: 7/30/2020

Summertime brings opportunities for streets projects in Flagstaff.

Phase I of the Coconino Estates Project broke ground this month, replacing water and sewer lines, adding fire hydrants, storm drains, curbs, gutters, new lighting, and then finally repaving the streets. It's a big improvement to safety and quality of life for Coconino Estates residents. This project will be completed in phases through 2022.

The Industrial Drive Waterline Project which begins August 3, installs over 2000 linear feet of 16" pipe between Steves Boulevard and Caden Court. Project completion date is November 2020. To get a full listing of FY21 Water Services Projects, check out our [Capital Improvement Map](#).

Summertime is known as the season of road construction in our mountain town. But the improvements to our streets and water system will last for years to come. With over 439 miles of underground potable-water pipe running through our city and a proactive infrastructure replacement program, it's hard to avoid the inconvenience of road work. Be patient, enjoy the summer, and take a long drink of Flagstaff's high-quality mountain water!
