

Flooding and Easements

You can help to protect your property and neighborhood!

Easements are designated routes across private property, allowing utilities to provide services in your neighborhood. They often incorporate critical drainage features that the home or business owner is responsible for maintaining.

When rainwater is flowing through drainages that are blocked on private easements, flooding can occur.

You Can Make a Difference!

A blocked easement or drainage can quickly create a flooding issue.

- Clear all loose debris on or around your property
- Make sure the drainages remain cleared of debris
- Clean up mud and debris from your property after each storm
- Call **928-213-2400** if:
 - You need to report drainage blockages
 - You observe flooding on your property
 - Mitigation efforts by adjacent property owners are impacting your home or business

We are all in this together, and together we will help each other!
