Regulatory Compliance

Date: September 19, 2022

Re: **Notice of Code Change**

Flagstaff Water Services has proposed updates to existing City code:

- Title 7 Health and Sanitation
 - Chapter 07-02 Wastewater Regulations

This is a periodic update to align City code with federal and state guidelines, providing clarification for industrial users/businesses to make the compliance process easier. **These changes do not impact fees.** Proposed City code changes can be found [here](#).

The proposed changes will align City code with language found in EPA 40 CFR 403 as directed by an ADEQ inspection. Following is an overview of updates, with their locations in the code:

- 07-02 Wastewater Regulations
 - **001-0010 Industrial Self-Monitoring**
 - The first change in this location will require a resampling event to be conducted and report submitted to the City within 30 days. Currently, code requires a resample event to be conducted within 30 days, but not submittal of the report.
 - The second change within industrial self-monitoring adds language that the record retention requirement for both the industrial user and the City can be extended if there is unresolved litigation, or when requested by the State Director or EPA Regional Administrator.
 - **Section 001-0012 Signatory Requirements**
 - This will change the definition of the manager to match the updated EPA language.

This proposal will be presented to City Council during the **Nov. 1** meeting. A public meeting will be scheduled **only if** there is need for further discussion of these updates. Feedback and questions can be sent to Jolene Montoya, Industrial Pretreatment Manager, at Jolene.Montoya@flagstaffaz.gov or (928) 213-2117.
